

Gabriel R. Edwards

Columbia, Missouri

gre4bt@umsystem.edu — (314) 603-7042 — gabeedwards.com — github.com/gabeedwards1

Education

University of Missouri–Columbia

B.S. Computer Science — Certificate in Cyber Security

Anticipated Graduation: Dec. 2026

GPA: 3.5

M.S. Computer Science — Accelerated B.S./M.S. Program

Anticipated Graduation: Dec. 2027

University of Missouri–Kansas City

Aug–Oct 2025

Micro-credential, U.S. Department of Education Center of Excellence in Spatial Computing

- Analyzed geospatial datasets using **Python** and R to extract spatial insights with open-source analytics tools.
- Applied AI/ML techniques to spatial computing problems within AR/VR environments.
- Developed AR/VR applications in Unity integrating AI/ML models for spatial interaction.

Professional Experience

Technology Risk Consulting Intern

Summer 2026

RSM US LLP — Kansas City, MO

- Performed ITGC testing and risk assessments for **FFIEC-regulated financial institutions** across IT governance, network security, cybersecurity, data governance, and **AI governance** domains.
- Tested logical access controls (provisioning, privileged access, authentication, segregation of duties) and audited cybersecurity infrastructure (MFA, incident response, **vulnerability management**, SOC reports) to evaluate control effectiveness.
- Applied Excel-based data analytics for population completeness/accuracy testing and exception tracking, and contributed to a Microsoft **Power Platform** (Power Apps, Automate, BI, Copilot) engagement management system.

National Science Foundation Research Intern (REU)

Summer 2025

University of Missouri–Columbia — ACE: Adaptive Content Engine for Cybersecurity Education in VRs

- Designed a VR-based cybersecurity escape room that adapts difficulty using **reinforcement learning (RL)** models and learner behavior analysis.
- Integrated **PPO** and **IRL** models with **LLM**-generated hints to provide adaptive, personalized guidance.
- Evaluated model performance through gameplay analytics and presented outcomes at the NSF REU showcase.

Research & Relevant Projects

Undergraduate Research Assistant — SAGE (Student-Focused Adaptive Guidance Engine) Sept. 2025 – May 2026

University of Missouri–Columbia, AI Education, Research and Infrastructure (AERI) Lab — Advisor: Dr. Prasad Calyam

- Contributing to SAGE, an intelligent tutoring framework that enforces instructor-regulated learning through a three-layer gatekeeper access-control system (role-based, attribute-based, cognitive state-based) built on a knowledge graph of learner state and curricular content.
- **Led UI development** and co-authored “SAGE: Student-Focused Adaptive Guidance Engine for Intelligent Tutoring with Regulated Learning” (ICHMS 2026); benchmarked SAGE against **LLM** baselines, achieving **90% curriculum access-control security vs. 30%** for prompt-based tutors with comparable helpfulness (44% vs. 42%).
- Preparing the system for a pilot deployment in Mizzou CS courses, Fall 2026.

TigerHacks Hackathon — 2nd Place

Nov. 2025

Red Atlas

- Built an interactive 3D Mars map enabling users to plot waypoints on a rendered Martian surface using CesiumJS.
- Implemented A* pathfinding with geodesic-based heuristics in **Python** to compute optimal routes across spherical terrain.
- Deployed and hosted the full application using Vultr for live demo during the competition.

Leadership & Activities

Web Developer

2024 – Present

- Designed and launched **5+ client websites** with responsive layouts and SEO optimization.
- Manage hosting, maintenance, and performance updates for reliability and security.

Founder, Cybersecurity Special Interest Group

Sept. 2025 – Dec. 2025

University of Missouri

- Established the university’s **first student-led cybersecurity special interest group**.
- Organized workshops, guest talks, and hands-on labs to promote cybersecurity awareness and skills.
- Coordinated with faculty and peers to grow membership and integrate SIG activities within campus communities.

Technical Skills

- **Security Tools:** Kali Linux, Burp Suite, Metasploit, Nmap, Wireshark, Autopsy, VMware Fusion
- **Threat Modeling & GRC:** STRIDE, OWASP Threat Dragon, NIST CSF, ISO 27001, SOC 2, ITGC Testing, FFIEC Guidance, IAM, Vulnerability Management, AI Governance
- **Programming & Development:** C, Java, Python, Swift, SQL, HTML/CSS, JavaScript, iOS (SwiftUI)
- **ML & Tools:** PyTorch, LLMs, Reinforcement Learning (PPO, IRL), Git/GitHub, Linux/Unix CLI, Power Platform
